Subject: Confirmation of pre-registration under REACH

Dear customer,

REACH is the new European Community Regulation on chemicals and their safe use. It deals with the **R**egistration, **E**valuation and **A**uthorization of **C**hemical substances which must be registered at European Chemicals Agency (ECHA) in Helsinki.

We confirm:

- That we have preregistered under REACH all relevant substances manufactured in or imported to the EU by TANATEX Chemicals.
- We have ensured pre-registration also for substances that we obtain from our suppliers, to the extent that this is possible.
- That we have no reason to withdraw products because of REACH. In principle our product (port)folio for the current applications will be maintained.

Preregistration numbers

As company we have the policy due to organizational and administrative reasons that we do not give preregistration numbers to customers. Furthermore not all substances have a pre-registration number, for the simple reason that they have not been pre-registered because, they are not a phase-in substance, that they are manufactured or imported below 1 tonne per year or that they are exempt from REACH (for instance polymers). Far more important is the statement above that we have pre-registered all relevant substances. This approach, in particular for preparations, polymer substances or polymer preparations, is independent of the different pre-registration numbers of substances contained in the product.

Registration intended use

TANATEX Chemicals will register all substances in their products for the use within the Textile Processing Industry as recommended in the technical bulletin. For substances purchased by our company, we will ensure that suppliers/manufacturers/importers include such uses in their registration dossiers.

In case you use a product of TANATEX Chemicals for another application, we kindly ask you to inform us accordingly so we are able to take this into account during the registration phase.

If you have any questions, please do not hesitate to contact us. However, please respect the status that we are at present not in a position to respond in detail to the abundance of queries – concerning the future anticipated registration status of particular substances – that we receive. We assure you that we will ask and provide the necessary information via your contact person in time.

We trust to have informed you sufficiently for now and thank you in advance for your support.

With kind regards,
TANATEX Chemicals REACH Team

Rob Duijghuisen
Manager Quality, Health, Environment & Safety
